# The Story

The Prince accidentally unleashes the Sands of Time — a terrifying force that absorbs every living thing it touches, and turns them into horrifying sand creatures. He now has to undo the catastrophe he created. His only companion is Farah, a beautiful, mysterious young Indian princess. And he doesn't trust her. But she may turn out to be an invaluable ally after all ...

## Game Features

You must seek out the sands of time. As you plunge into the dark and mysterious world of medieval Persia, you'll be charmed by the sumptuous graphics and animated decors of the 6 levels and 3 different scenes of action that make up this intricate tale.

To thrive in the adventure, you'll have to track down and operate levers, find potions and shift chests, while avoiding sly, lethal traps, like sharp stakes that spring up on your path. Pit your wits against the many puzzles and prove your skill in handling either a sword or dagger when confronting guards, bowmen and bats — and emerge victorious from these epic conflicts! Through the first levels, you'll get to know more about your new universe, the different elements which compose it and the full scope of your abilities: destroy whole wall panels, walk on walls, leap over chasms and perform rolls. But watch your step! Though the sands of time allow you to acquire new powers with amazing speed, they become more threatening — and your enemies more dangerous — as time goes by!

# Controls for the game
